

RELIABILITY · PERFORMANCE · FLEXIBILITY

TorqBase

- Powered by Hirth Engine

Ninety years of two-stroke
engineering. Every answer cited. Every
number verified.

PROBLEM

The manual is 800 pages. The engine won't start. The clock is ticking.

SCATTERED

7 engine models — **4103 to 2302** — each with its own manuals, bulletins & repository.

PRECISION

A wrong number — wrong RPM, wrong fuel ratio — **means engine failure.**

LANGUAGE

The knowledge exists. The problem is finding it - correctly, fast, in multiple languages

BURIED

Expert knowledge **locked in documents** nobody has time to read.

The knowledge exists.

The problem is finding it - Correctly & Fast

Ask anything. Get a **cited, grounded** answer.

GROUNDING

Every number traces back

Each value maps to a source chunk. **Never hallucinates specs.**

MULTILINGUAL

One index, EN or DE

One system, any engineer — ask in either language.

DIAGNOSTIC

Symptom → Cause → Fix

Knowledge Graph answers the whole path **in one query.**

Four beats, live.

- 01

Upload Any File

Watch **8 pipeline stages** stream in real time — parse → chunk → embed → index.
- 02

Ask any Questions

"What is the endurance test requirement?" → **Cited answer** ✓
- 03

Diagnostic question

"Why does the engine misfire?" → **Symptom** → **Cause** → **Fix** path from the Knowledge Graph.
- 04

Click any citation

Opens the exact source. **Every claim, fully traceable.**

03 - APPLICATION DEMO

LET ME SHOW YOU.

Upload a real spec. Watch it parsed, indexed,
answered & cited

What we're building next.

Infrastructure · Data · Scale

Performance & reliability

Async ingestion queue, connection pooling, error recovery, observability.

Engineer validation

One session with a Hirth technician validates the diagnostic paths.

Mobile interface

Field technicians on the airfield need answers offline, on phone.

Same infrastructure.

Each step adds data, not rebuild.

TORQBASE

Ninety years of two-
stroke engineering.
Eventually, in every
technician's pocket.

In 30 seconds.
